Alex McCown

Bennifer Version 2.0

Frankly, this new model is a bit of a disappointment. A frustrating color adjustment from transparent to opaque lessens the fun factor by a good bit. **EXTRAS:** Almost none, save a few lukewarm films (no idea why they replaced the blockbusters that used to be included with these pitiful offerings), and a teaser trailer for the upcoming baby release. Assface Jr. is scheduled to drop sometime in '06.

Paris Hilton

This model seems to have something for just about everyone, the only downside being that the actual features clearly do not live up to the hype on the package. Also, somewhat bizarre, is the inclusion of two additional vaginas. That being said, the "disrobing" command gets plenty of mileage, and the makers have installed a fun addition by freezing the "Act Like a Total Cunt" setting on Random/Frequent. **EXTRAS:** This is where this product really shines, as it offers a vast array of bonus footage, outtakes, money shots, and hostings of the Teen Choice Awards. The Nicole Richie has gotten noticeably smaller.

Tom Cruise

This product, popular for quite some time now, has regrettably proven itself to have a rather sudden expiration date. Keep an eye out for this as soon as it starts exhibiting wildly erratic behavior. That aside, this product can offer a ton of fun, especially now that they've added the argument feature, which tells you why psychiatry is a hoax.

EXTRAS: A solid number of blockbusters, a great mental lapse via Scientology, and many other unhinged statements (included in the box) will provide hours of additional entertainment.

George Bush

This reintroduced model gets just about everything right that was so badly missing the first time around: wits, patience, diplomacy, and the addition of a "President" feature that frankly almost doubles the product's worth. Getting over being intimidated by the sheer vastness of this product's resources takes some getting used to (much like learning Unix for the first time), but once you do, you'll be glad you did. **EXTRAS:** A whole host of various hangers-on and talking heads, all of which merely serve to reinforce the general sense of hope for the future. [Note: this is a reprint of the original review which appeared in 1988.]

Clint Eastwood

Continues to be a hot seller, despite the rarely talked-about "Overt Misogyny" feature. The big plus is, of course, that as the product ages, it gels into a rock-hard mix of leather and formaldehyde. Caution: If you talk bad about white people in front of it, this product will kill you. **EXTRAS:** Not many, but the Instant Prestige is a nice addition.

Pope John Paul II

This product line is no longer available. Please refer to our Benedict XVI upgrade.
